PG Certificate Program in Data Science and Machine Learning

Offers A Perfect Blend Of Data Science Concepts
& Machine Learning Tools

The Future Is Data Science, The Calendars Confirm

The world has been transforming as fast as the speed of light, thanks to the onset of new technological developments. But, as these digital transformations change the way we function, especially in the business world, the criticality of becoming a data-sound professional keeps increasing by the minute. Organizations want to settle for nothing but the highest of the highest positions in the ever-competitive corporate setup, and thus, they're always on the lookout for data-smart candidates who can make it happen. While many careers become obsolete with the advent of newer technologies, Data Science professionals enjoy a fair share of demand from companies all over the world, and statistics point out that this high demand will only continue to go up as we move closer to the future.

What our learners have to say about the PG Certificate Program in Data Science and Machine Learning

Sreshta Sinha Roy
Research Analyst

“Even with a B.E in E&C, I knew that I needed a specialization to make a mark. I opted for an online course & soon realized it won’t be enough. But this Data Science program with hackathons, datathons & industry interactions truly gave me my edge. And today, I’m with Amazon.”

Venkata Ravindranath
Consultant

“As a JS Developer, I was making a modest salary in a stagnant role & I wasn’t excited about my growth prospects. With this Data Science program, I got that crucial upgrade as a Data Consultant, with an 86% pay hike!”

Swapnil Singh
Machine Learning Scientist

“This program is amazing for those candidates who want a career transition or who are looking to start their career in the field of analytics. It's best to focus on the curriculum they made, and if you follow it strictly you will definitely have a good job just the way I did.”

Piyush Sharma
Consultant

“I recently finished this Data Science program from UNext Jigsaw & got placed in one of my dream companies, Equifax!”

Akalya Subramanian
Data Analyst

“This course by UNext Jigsaw is the best option for someone who wants to pursue a career in Data Analytics. It's a good course with a highly experienced teaching faculty.”

Suraj Thallapalli
Associate Data Engineer

“The placement process started in the second term of the program & many Data Science-based companies like Equifax, dhiOmics & Fractal Analytics came to hire learners across several roles like Data Science Consultants, Data Analysts, Machine Learning Scientist, etc. I’m happy I got placed in Equifax & am thrilled to start my Data Science journey.”

Soubhagya Ranjan Bal
Network Engineer

“Even during the pandemic, the placement team worked really hard to bring companies in. It was a big transition for me from the networking domain to this Data Science world but I finally got selected as a Business Consultant Intern at Eversana.”

Halappa Guruppanavar
Business Analyst

“As a BBM graduate, I had almost accepted that I can never make it into analytics, because of my lack of relevant education. But this program didn’t just bring me my dream job but also a salary hike of 110%.”

Abhishek Nonia
Data Science Enthusiast

“When I joined this program, I had zero coding experience. But because of the constant support of the experienced faculty of UNext Jigsaw, I got to learn and master something new everyday. It was a great learning experience for me.”

Sachin TC
Data Scientist

“I personally benefited a lot from this program as it helped me transition from the insurance/risk management sector to the domain of Data Science”

Sureya Subramanian
Data Analyst

“Being a fresher, I was quite worried at the beginning as these topics were all new to me. But the faculty here are amazing, they teach everything from scratch.”

Karan Katle
Analyst

“Even if you are a fresher and do not have a Computer Science or Data Science background, the university takes care of it. UNext Jigsaw’s team always keeps up to their words and provides ample placement opportunities.”

Kaushik Kailasnath
Senior Technical Specialist

“I really enjoyed the UNext Jigsaw course, thanks to the sharp faculty and prompt IT support. The course instilled in me a curiosity towards statistics and I am eager to learn more! I strongly recommend this course to anyone who wants to delve deeper into the world of analytics. Apart from learning, it helped me switch to a data scientist role.”

Arunima Bannerjee
Data Science Enthusiast

"The 9 months Data Science & ML program at UNext Jigsaw offers an excellent pedagogy, systematic course-design, and great support from the team for problem-solving and doubt clearing. It is really helpful for anyone who wants to upskill or make a fresh entry to the ever-widening landscape of Data Science."

Omprakash Pullarwar
Data Science Enthusiast

"The teaching faculty and the student support are both excellent. The faculty members are highly experienced and teach very well. The exercises given on each topic helped me get a very good grip on the concepts that was taught to us. This program makes learning an enjoyable experience."

Vani Anbu
Data Science Enthusiast

"From my experience, as an IT professional who was actively looking for a job switch to the Data Science field, I would recommend taking up this program offered by UNext Jigsaw."

PG Certificate Program in Data Science and Machine Learning In A Snapshot

Guaranteed Placement*

Get a 100% Guaranteed Placement* after successfully completing the program

9 Months Online Live Classes

Live Interaction with SMEs & Experienced Faculty (On Weekends)

Hands-on Learning Experience

Includes tools like Jupyter Notebook, Tableau, SQL, NoSQL, MongoDB, TensorFlow, etc., 6 Mini Projects & 1 Capstone Project

Enhance AI & ML Proficiency

Master AI, ML & Neural Networks that emphasize the creation of intelligent machines.
